SUPER TUESDAY COMMUTER BIKE COUNT

GREATER SHEPPARTON

2017

SUPER TUESDAY

Count Summary in Greater Shepparton

COUNT IN 2017

p. 1

The Super Tuesday Commuter Bike Count was conducted on Tuesday 7 March 2017 for two hours from 7am to 9am.

It was a pleasant morning in Greater Shepparton on the day of count reaching the temperature of 18 degrees at 9am.

By participating in the count, volunteer counters can choose a local community group to make a donation of \$50 to. In Greater Shepparton a total of \$1000 went back to the local community through donations to nominated groups.

COUNT

p. 3

20 sites were surveyed in Greater Shepparton.

Major commuter corridors include:

- Goulburn Valley Highway
- Welsford Street
- Wyndham Street

TRAFFIC FLOW

A total of 607 trips was collected at all selected intersections across the municipality during the two-hour survey.

GROWTH

p. 4

Overall the usage decreased by 4% (20 trips) compared to the same 16 sites surveyed in 2016 (521 trips).

GENDER RATIO

p. 5

Female riders represented 19% of bicyclists across the municipality.

This is below the average female ridership in Victoria (22%), and below the average of all the surveyed areas in 2017 (21%).

PEAK HOUR

p. 6

The busiest hour was between 7:00-8:00am during the survey.

The average volume in 15 minute time intervals is as follows.

- 7:00-7:15am: 8 trips
- 7:15-7:30am: 3 trips
- 7:30-7:45am: 3 trips
- 7:45-8:00am: 3 trips
- 8:00-8:15am: 4 trips
- 8:15-8:30am: 4 trips
- 8:30-8:45am: 2 trips
- 8:45-9:00am: 3 trips

BUSIEST SITE

The busiest site was at the intersection of Goulburn Valley Highway and Wilmot Road with an average of 25 trips per hour.

COUNT RESULTS

p. 7 - 27

The summary data table and analysis on each site are included in this chapter.

Data table in Excel spreadsheet is supplied with this report.

Super Tuesday in 2017

THE COUNT

Super Tuesday Bike Count (Super Tuesday) is the world's biggest and longest running visual bike count. It measures bicycle commuter flows in the morning peak from 7am to 9am.

Across New South Wales, Tasmania, Victoria and Western Australia, 873 sites were surveyed across 42 councils. The number of cyclists, and gender ratios, were recorded at fifteen minute time intervals.

Super Tuesday 2017 was conducted on Tuesday 7 March 2017 between 7:00am and 9am. The national results showed a 5% decrease when compared to the same locations in 2016.

WEATHER

2017 weather conditions were mostly mild with a warm morning seen in Western Australia. The eastern states saw a cool morning that became fine by 9am. Tasmania had a colder start to the day than both New South Wales and Victoria. No states saw significant rainfall on the morning of the count, only passing showers in New South Wales and Victoria in some areas.

GENDER

A high proportion of female riders is a strong indication of the health of a city's cycling environment. The higher the proportion, the better the cycling infrastructure. In the top international cycling cities, women tend to comprise around 50% of cycling numbers. The 2017 Super Tuesday Bike Count saw an average of 21% female bike riders across Australia. This is a decrease of 2% when compared to the 2016 Super

Tuesday count.

15 MINUTE TIME INTERVALS

The peak hour across all sites was between 7:45am and 8:45am.

RESULTS BY STATES

New South Wales

The overall number of cyclists in NSW decreased by 26% when compared to the same sites as 2016. NSW also recorded the lowest percentage of female riders at 18%, a 1% decrease from 2016.

Tasmania

Tasmania had the second lowest decrease in cyclists with the overall number of cyclists decreasing by 8% when compared to the same sites in 2016. Tasmania recorded the highest proportion of female cyclists (tied with Victoria) at 22%, 1% higher than the national average. This is still a drop of 1% when compared to the Super Tuesday 2016 count.

Victoria

Victoria had the lowest decrease in cycling traffic with numbers only decreasing by 1% when compared to the same sites in 2016. Victoria had the highest proportion of female cyclists (tied with Tasmania) at 22%, 1% higher than the national average. This is a 3% decrease from the Super Tuesday 2016 count. Victoria also accounted for approximately 75% of all female cyclists recorded in Super Tuesday 2017.

Western Australia

Western Australia recorded a decrease of 8% in cyclists numbers when compared to

the same sites in 2016. Female cyclists made up 20% of all bicycle riders recorded, only 1% below the national average. This is a 2% increase in the proportion of female cyclists compared to the Super Tuesday 2016 count. Super Tuesday 2017 fell after a long weekend in Western Australia, perhaps a factor in the decreased bicycle traffic.

About Super Tuesday Count

About the count

The Super Tuesday Commuter Bike Count (Super Tuesday) shows reliable annual figures of bicycle commuters and their movements on roads and bike paths.

Since 2007, Bicycle Network has conducted bicycle counts at key intersections and corridors that were selected by local governments.

This information is accurate, relevant, up-to-date and cumulative for those councils who participate in Super Tuesday for consecutive years. The data is a critical tool for councils and other agencies, responsible for providing bike riding facilities for their constituents.

Aims and purposes

Super Tuesday is designed to complement the surveys that individual councils and other agencies run on a regular or occasional basis.

The project aims to answer few questions below:

- How many riders are there?
- Which routes are riders using?
- What is the year-to-year growth?
- How many women are riding?
- When is the busiest hour?

Methodology

The Super Tuesday Count collects data from intersections along popular commuter routes in the municipality and from subsidiary routes that are of a lower priority.

Bicycle Network coordinates the count at locations nominated by traffic engineers, transport planners, TravelSmart officers, or council officers working in infrastructure, sustainable transport or active lifestyle and health promotion.

The counts were conducted by volunteers who record all movements, gender of riders and their observations in fifteen minute time intervals on standardised count sheet.

Following the completion of the visual count, counters send the count data to Bicycle Network by one or more of the following:

- Online: by entering the data directly via the web link
- Email: by sending completed electronic tally sheet attached
- Mail: by posting hard copy to the Bicycle Network office

The submitted data are validated, analysed by Bicycle Network and compiled into reports for participating councils and other agencies.

Changes from previous count

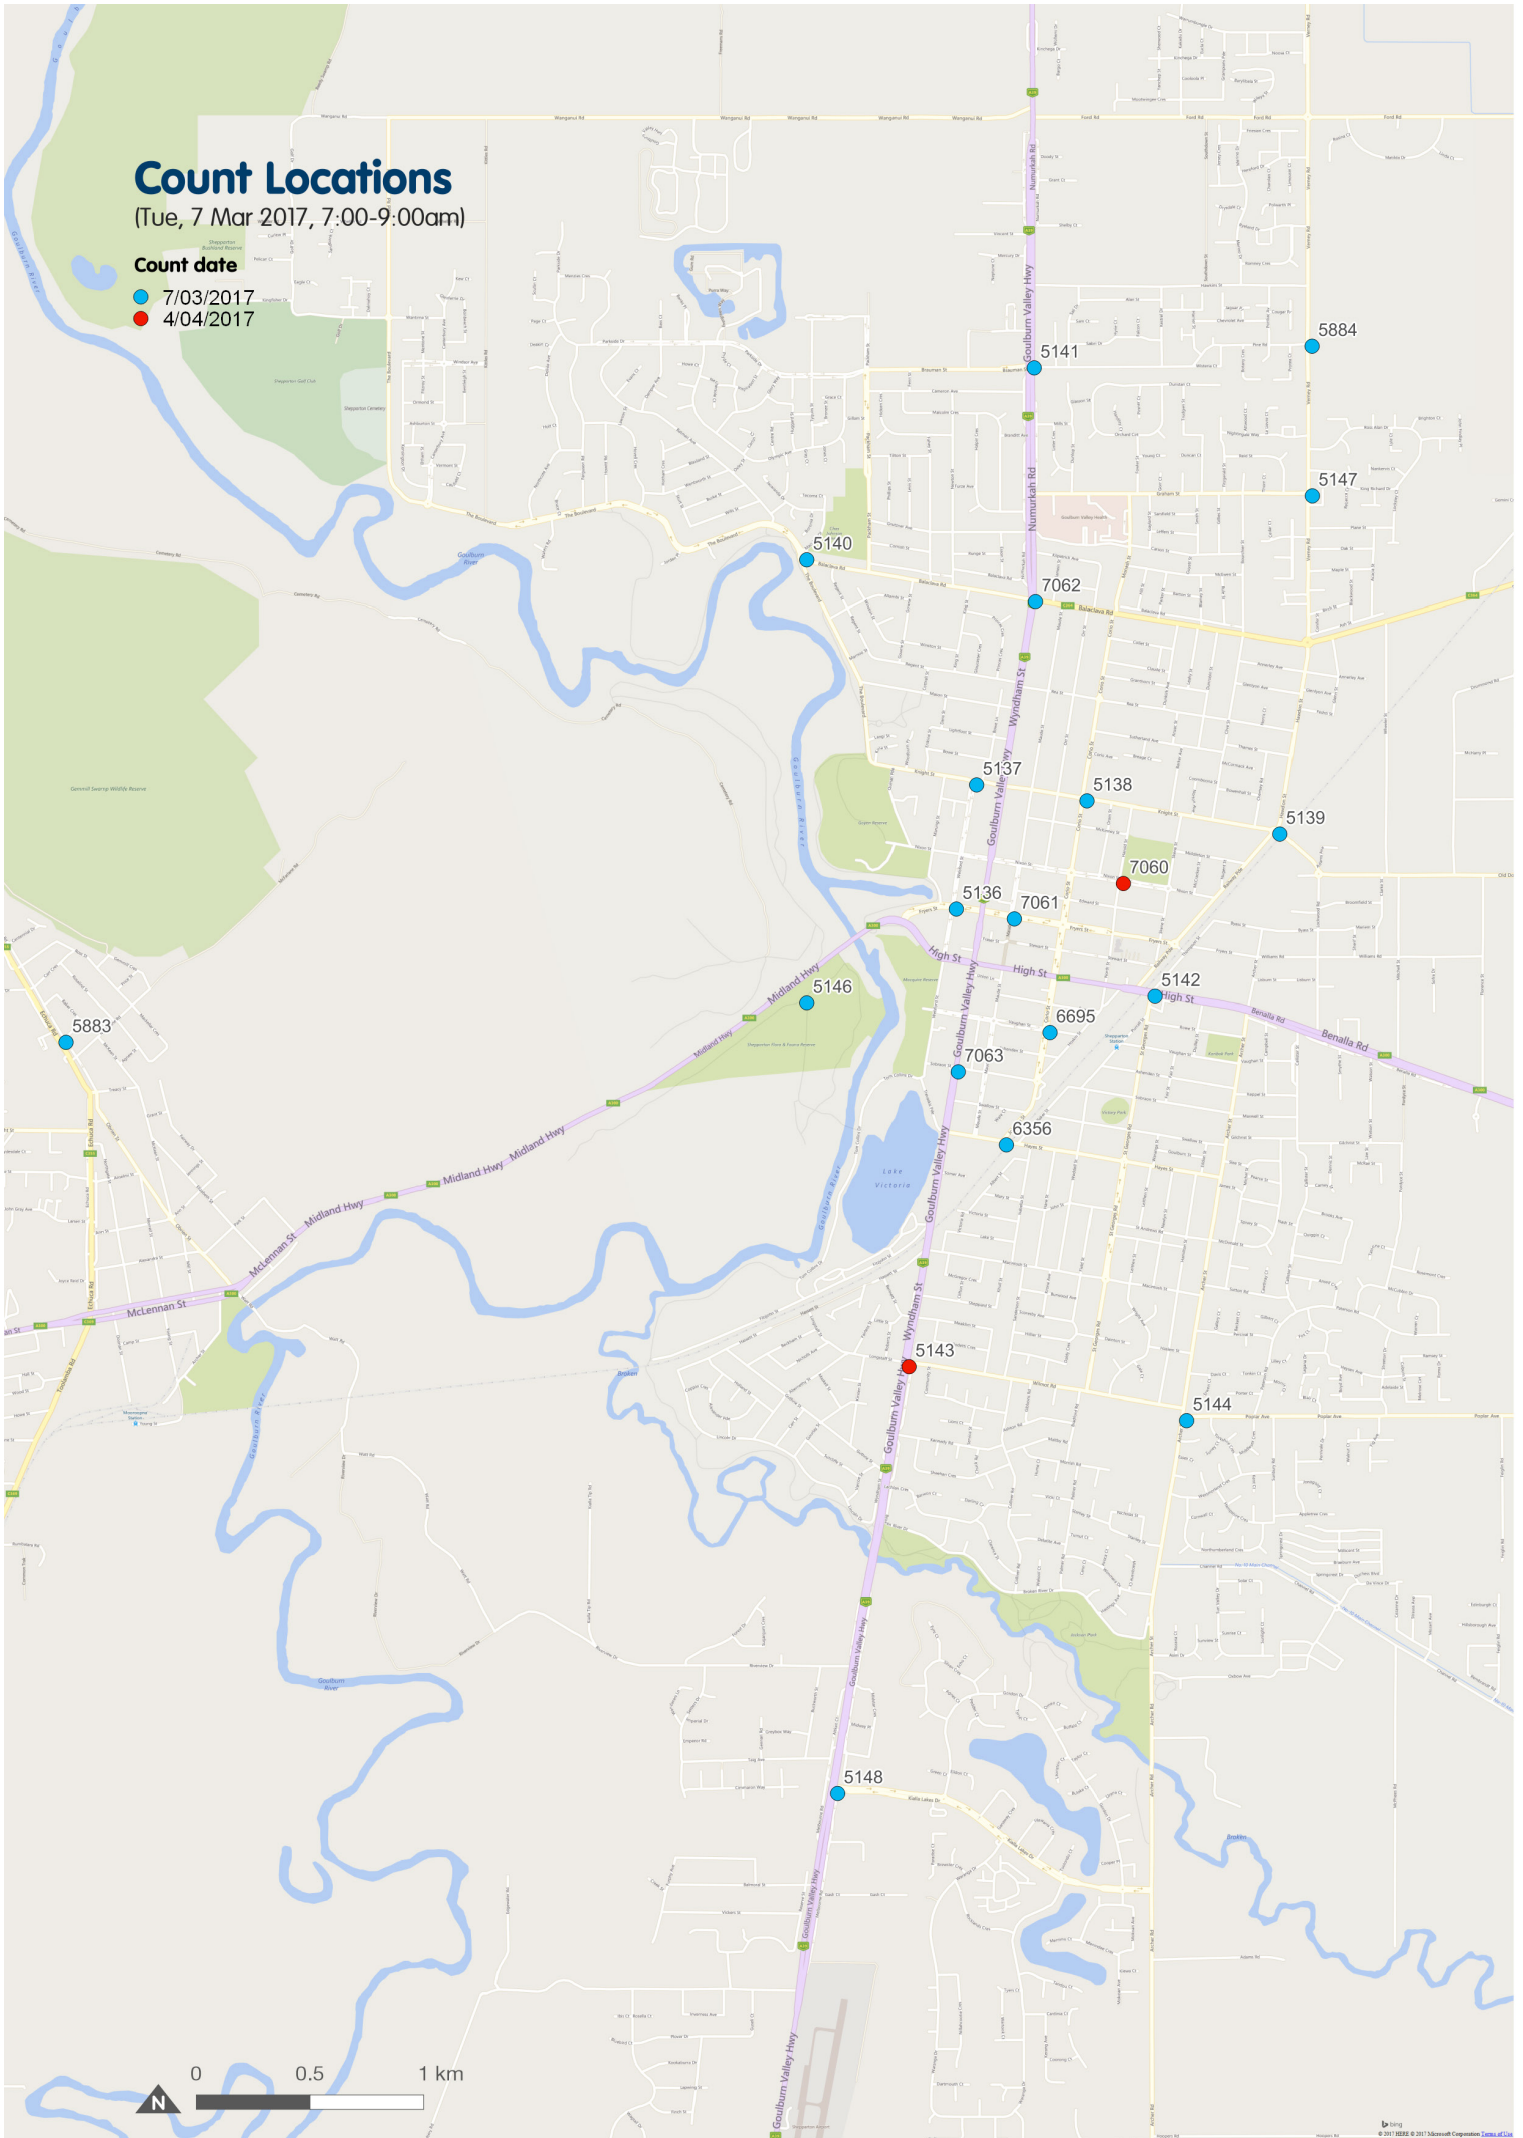

- Sites 7063, 7060, 7061 and 7062 are all new sites for the Super Tuesday 2017 count. Therefore there are no growth figures for these sites.
