SUPER TUESDAY COMMUTER BIKE COUNT

GREATER SHEPPARTON

2018

SUPER TUESDAY

Count Summary in Greater Shepparton

COUNT IN 2018

p. 1

The Super Tuesday Commuter Bike Count was conducted on Tuesday 6th of March 2018 for two hours from 7am to 9am.

It was sunny in Greater Shepparton on the day of the count, with SSE winds reaching 15km/h, and a maximum temperature of 16.5 degrees at 9am.

By participating in the count, volunteer counters can choose a local community group to receive a donation of \$50. In Greater Shepparton a total of \$1000 went back to the local community through donations to nominated groups.

COUNT SITES

p. 3

20 sites were surveyed in Greater Shepparton.

Major commuter corridors of interest include:

- Goulburn Valley Highway (5 sites)
- Knight Street (3 sites)
- Welsford Street (2 sites)

TRAFFIC FLOW

p. 4

A total of 501 movements was counted at all selected intersections across the council area during the two-hour survey.

GROWTH

p. 5

Overall, usage has decreased significantly by -21% (448 movements) compared to the same 19 sites surveyed in 2017 (564 movements). New sites were excluded from this comparison.

GENDER RATIO

p. 6

Female riders represented 21% of bicyclists across the municipality.

This is lower than the average female ridership across Victoria (24%), and the Australia-wide average of surveyed areas in 2018 (24%).

PEAK HOUR

p. 7

The busiest hour was between 7:00 - 8:00am during the survey.

The average volume in 15 minute time intervals is as follows.

- 7:00-7:15am: 6 movements
- 7:15-7:30am: 2 movements
- 7:30-7:45am: 4 movements
- 7:45-8:00am: 2 movements
- 8:00-8:15am: 3 movements
- 8:15-8:30am: 2 movements
- 8:30-8:45am: 3 movements
- 8:45-9:00am: 2 movements

BUSIEST SITE

p. 17

The busiest site was at the intersection of Goulburn Valley Hwy [N], Yahna Gurti' Share Path [SE], Hwy Bridge [S], Yahna Gurti' Share Path [NW] (Site 5145) with an average of 23.8 movements per hour.

COUNT RESULTS

p. 8 - 28

The summary data table and analysis on each site are included in this chapter.

Data table in Excel spreadsheet is supplied with this report.

Super Tuesday in 2017

THE COUNT

Super Tuesday Bike Count is the world's biggest and longest running visual bike count, where volunteers measure bicycle commuter flows in the morning peak from 7am to 9am across the country. The count provides quantitative surveys with figures on the movements of bike users, helping councils provide and improve infrastructure and facilities for people riding bikes.

The Super Tuesday count was conducted on Tuesday 6 March 2018 between 7:00am and 9:00am. Where necessary, a recount was conducted on Tuesday 27 March.

In the 2018 count, 790 sites were surveyed across 38 councils. Over 128K movements were recorded across Australia during the two hour count. The national results showed a 1% decrease when compared to the same locations in 2017.

Volunteer participants were thanked with a donation of \$50 from Bicycle Network to a community group of their choice. The total donation value neared \$40K.

GENDER

A high proportion of female riders is a strong indication of the health of a city's cycling environment. The higher the proportion, the better the cycling infrastructure. In the top international cycling cities, women tend to comprise around 50% of rider numbers. The 2018 Super Tuesday Bike Count revealed females comprised 24% of all bike

riders counted across Australia. This is an increase of 3% when compared to the 2017 Super Tuesday count.

PEAK HOUR

The peak hour across all sites was between 7:45am and 8:45am, with an average of 223 movements per site.

RESULTS BY STATES

Tasmania

The overall number of cyclists in Tasmania remained the same when compared to the same sites as 2017. Females comprised 26% of all riders, the highest proportion across all participating states.

Weather conditions during the count were cool and sunny, with gentle winds and a top of 13.7 at 9am. No rainfall was recorded.

Victoria

In Victoria, the number of riders increased by 2% when compared to the same sites counted in 2017. Female riders comprised 24% of the total proportion of riders counted across the state, on par with the national average.

It was clear and sunny across Victoria, with a top of 15.9 degrees at 9am and no reported rainfall.

New South Wales

In New South Wales, the number of cyclists decreased by 2% when compared to the same sites counted in 2017. Female riders comprised 20% of the total proportion of riders

counted across the state, which is 4% lower than the national average.

Weather conditions were generally fine across NSW, with warm temperatures and 28km/h winds. 5.6mm of rainfall was recorded during the day, which may have impacted some council areas.

Western Australia

In Western Australia, the total number of cyclists decreased by 11% when compared to the same sites counted in 2017. Female riders comprised 20% of the total proportion of riders counted across the state, 4% lower than the national average.

It should be noted that weather conditions were significantly hot across WA during the count, with a top of 30.1 degrees at 9am. Heavy showers occurred in some areas prior to the count, which may have led to wet roads.

About Super Tuesday Count

About the count

The Super Tuesday Commuter Bike Count (Super Tuesday) collects reliable annual figures of bicycle commuters and their movements on roads and bike paths.

Since 2007, Bicycle Network has conducted bicycle counts at key intersections and corridors that were selected by local governments.

This information is accurate, relevant, up-to-date, and provides a longitudinal reflection of cycling activity and trends. The data is a critical tool for councils and other agencies responsible for providing bike riding facilities for their constituents.

Aims and purposes

Super Tuesday is designed to complement the surveys that individual councils and other agencies run on a regular or occasional basis.

The project aims to answer some critical questions:

- How many riders are there?
- Which routes are riders using?
- What is the year-on-year growth?
- How many women are riding?
- When is the busiest hour?

Methodology

The Super Tuesday counters collect data from intersections along popular commuter routes, as well as subsidiary routes with lower rider volumes.

Bicycle Network coordinates the count at locations nominated by traffic engineers, transport planners, and other transport officers from participating councils.

The counts were conducted by volunteer counters who record all movements, gender of riders and their observations in fifteen minute time intervals on standardised count sheets.

Following the completion of the visual count, counters send their data to Bicycle Network by one or more of the following:

- Online: by entering the data directly via the web link
- Email: by sending completed electronic tally sheet attached
- Mail: by posting hard copy to the Bicycle Network office

The submitted data are validated, analysed and visualised by Bicycle Network, and subsequently compiled into reports for participating councils and other agencies.

Special considerations

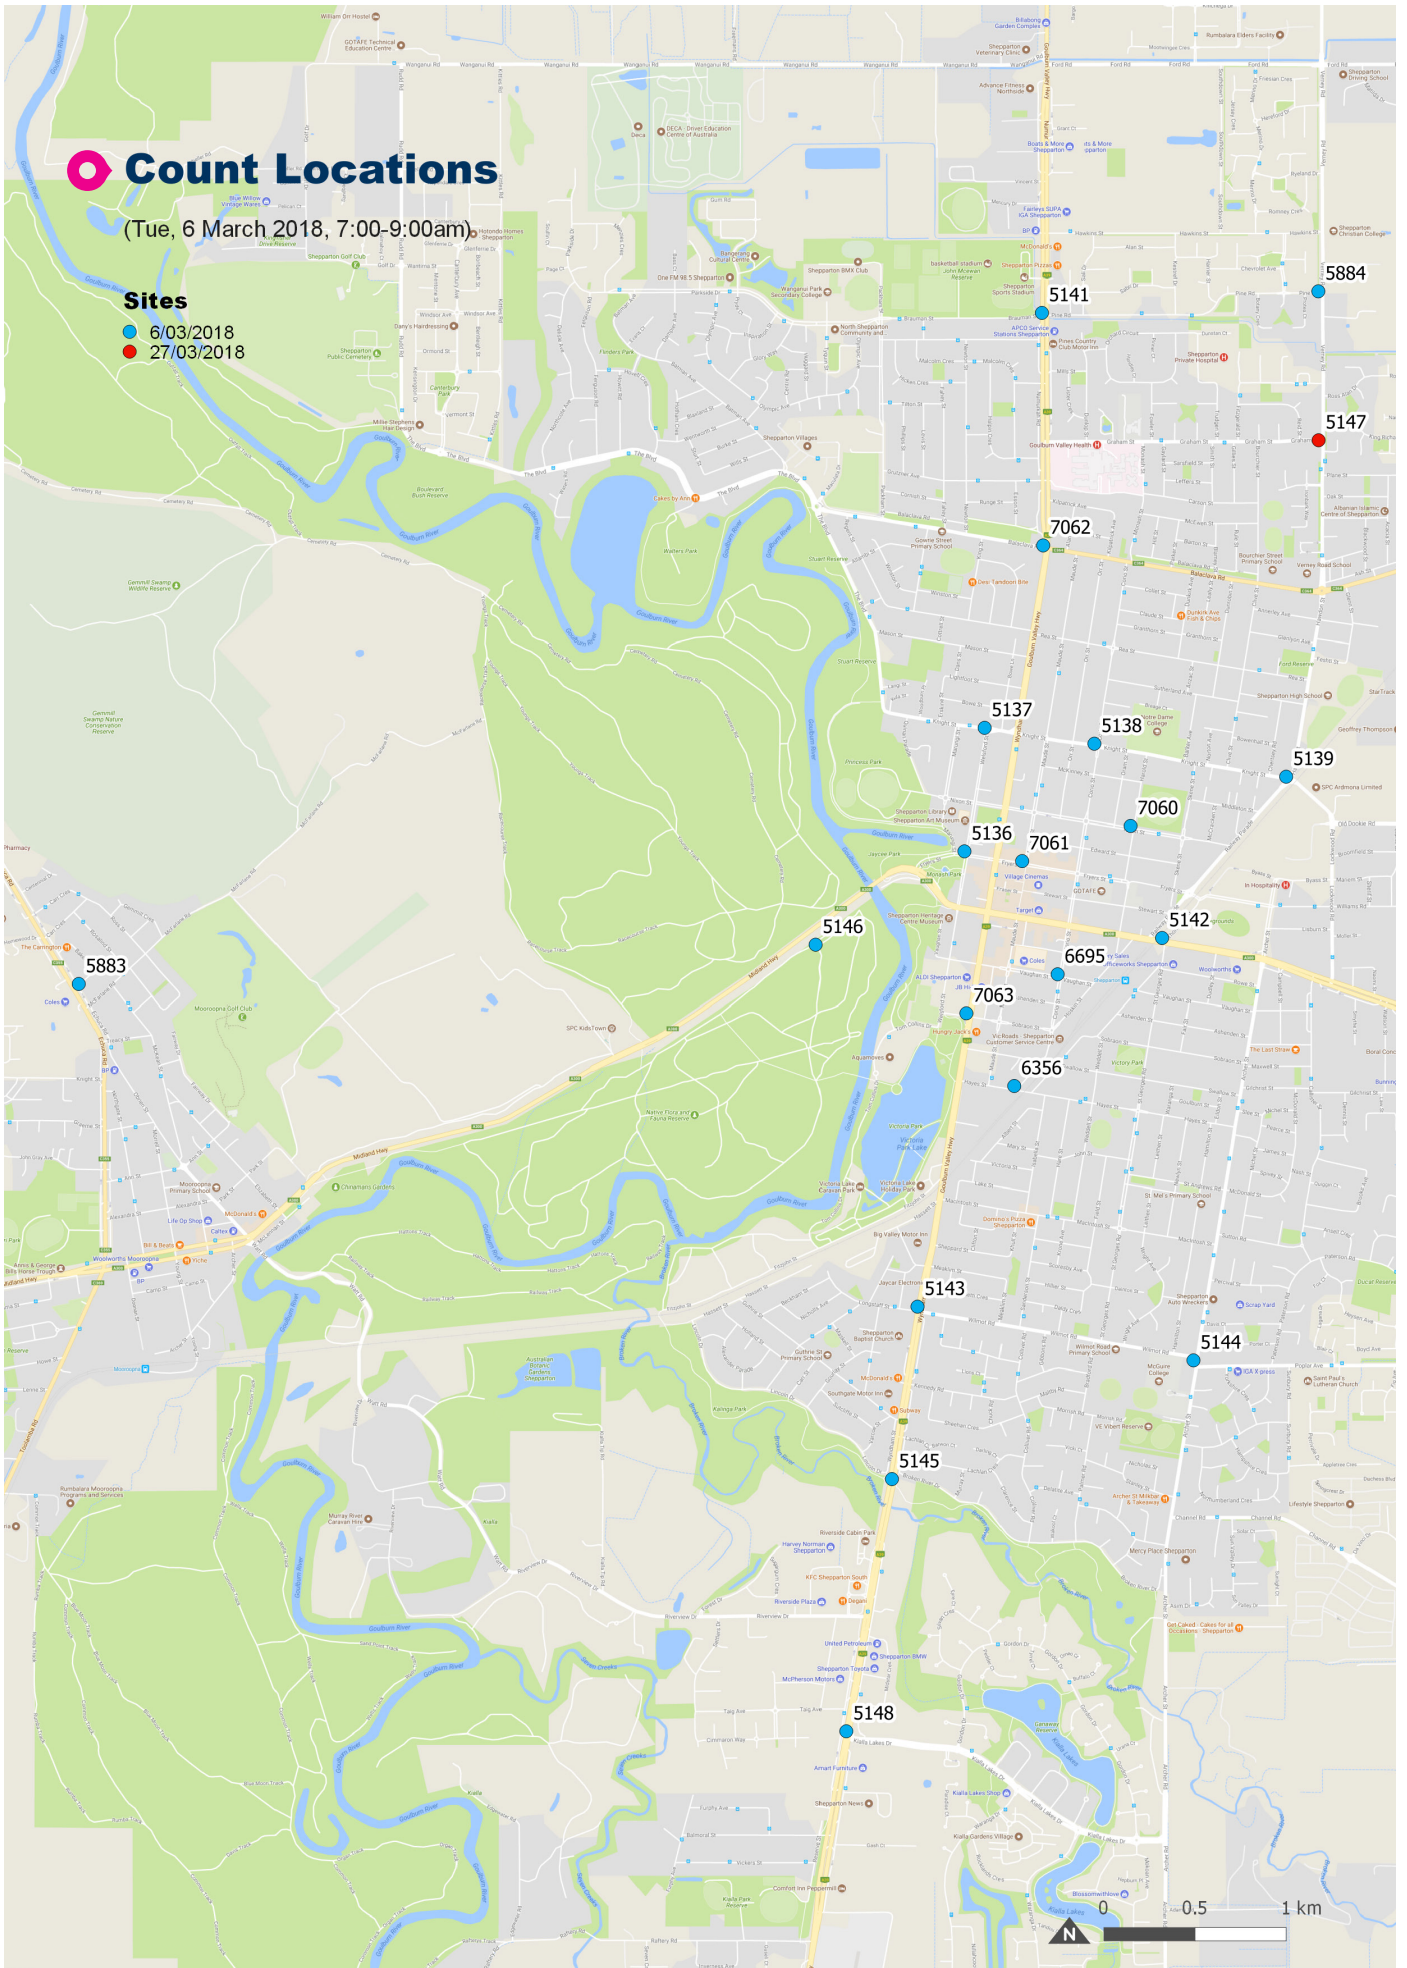

- One of the sites was not included in the 2017 count:
Site 5145 - Goulburn Valley Hwy [N], Yahna Gurti' Share Path [SE], Hwy Bridge [S], Yahna Gurti' Share Path [NW]
